

IFA – Ingenieurgesellschaft mbH operates the return and recycling solution **Öcorecell®** for obligated battery producers and distributors throughout Germany.

Öcorecell® already fulfills the legal collection and recycling requirements of 2016 now, the batteries are not disposed of at hazardous waste sites, all returned batteries are recycled.

The battery return system **Öcorecell®** extensively fulfills the obligations according to the battery law of the affiliated producers and importers.

- ➔ over 10 years of experience
- ➔ cost-efficient
- ➔ competent
- ➔ reliable

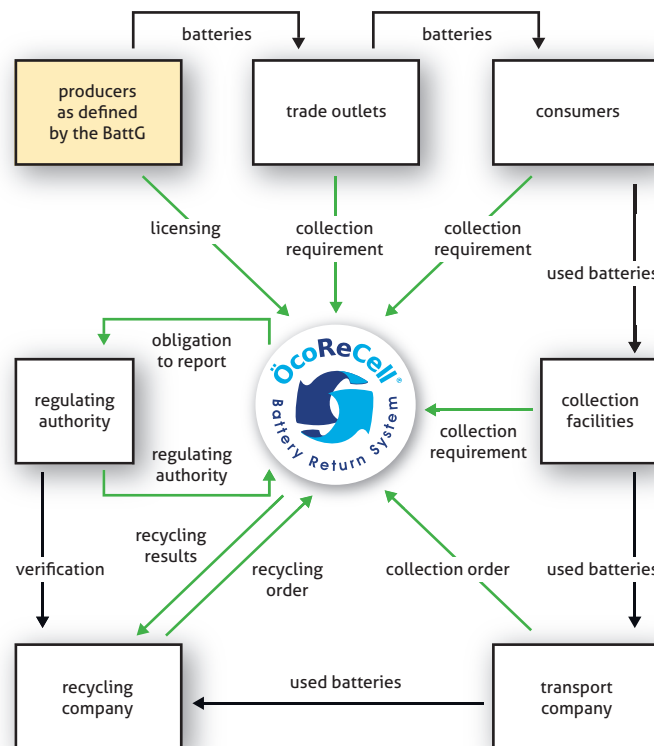

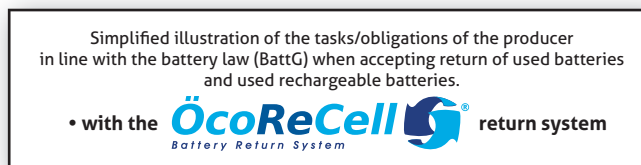

This is what **Öcorecell®** offers you:

- registration with the Federal Environment Agency according to §4 of the battery law (BattG),
- return of all old batteries throughout the country independent of type and brand,
- return with all distributors of portable batteries, all public waste disposal authorities and at all treatment centres,
- fulfillment of your notification obligation through provision of informative files in line with §18 of the battery law (BattG)
- provision of adequate collection containers,
- organisation of disposal,
- fulfillment of your administrative tasks concerning the surveillance authorities, fulfillment of your reporting and record – keeping obligations, fulfillment of obligations according to waste product law, documentation of recycling results.
- If you join our **Öcorecell® return system** but still remain a member of the communal return system in line with §6 of the battery law (BattG) we will carry out all formalities arising from the change.

Öcorecell® – the solution for, and the fulfillment of your obligations according to the battery law.

The green arrows relieve you.

Return of used batteries throughout Germany with the

Öcorecell® Battery Return System

IFA has more than 10 years of experience in the return and recycling of used batteries. As a battery producer and importer you are in good hands with the **Öcorecell®** battery return system since our services and prices are reasonable and in line with the market.

There are a number of return solutions for products and packaging in Germany. Among them are some good ones. **Öcorecell®** has managed to overcome the seeming discrepancy between economy and ecology with its return solution. By being members of **Öcorecell®** important customers take responsibility for their battery waste management.
